

SignGuy AI Report Catalog

Report Categories, Standard Reports, Builder Rules, and Export Structure

Purpose: Create one reporting system that can analyze data across the entire SignGuy AI platform without creating duplicate report engines in Operations, Business Management, Webstores, Wrap Lab, or Team tools.

Permanent Location in App: Business Management → Reports

Operational modules may open filtered report shortcuts, but they all use the same shared Reports engine and the same report definitions.

1. Reports Navigation Structure

Report Area	Purpose
Overview	High-level business and shop performance dashboard.
Financial Reports	Revenue, billing, payments, profitability, taxes, and cash-related reporting.
Operations Reports	Orders, production, approvals, documents, and service delivery performance.
Customer & Sales Reports	Customers, quotes, conversion, repeat business, and account performance.
Webstore Reports	Store sales, owner payouts, products, fundraising, and platform performance.
Materials & Purchasing Reports	Inventory, vendor spending, purchase orders, material usage, and waste.
Team & Labor Reports	Hours, payroll, labor efficiency, workload, attendance, and scheduling.
Wrap Lab Reports	Wrap project performance, install labor, vehicle mix, material use, and service quality.
Custom Reports	Build, save, share, and reuse reports across any approved data source.
Scheduled Reports	Automated recurring delivery of saved reports.
Exports	Central location for CSV, Excel, PDF, accounting, tax, payroll, and data exports.

2. Standard Report Page Components

- Date range selector: today, this week, last week, month-to-date, quarter-to-date, year-to-date, custom dates, and comparison period.
- Saved filters: customer, service/category, order type, salesperson, employee, location, store, production stage, payment status, vendor, and custom tags.
- Summary cards: the most important totals, changes from the comparison period, and exception counts.
- Charts: only when they help detect a trend, bottleneck, or comparison. Tables remain available for actual numbers.

- Drill-down: clicking a total opens the matching Orders, Customers, Invoices, Webstores, Purchase Orders, or Time Entries.
- Actions: save report, duplicate, export, schedule, share with role-based permissions, and add to dashboard.

3. Overview

The first Reports page. It answers: “How is the shop doing right now?”

Executive Summary

- Revenue collected
- Sales booked
- Open quote value
- Open order value
- Outstanding invoice balance
- Estimated gross profit
- Orders due soon
- Production workload
- Low-stock alerts

Trend Snapshot

- Revenue trend by week/month
- Order count trend
- Average order value trend
- Quote conversion trend
- Labor and material cost trend

Action Required

- Overdue invoices
- Quotes needing follow-up
- Orders at risk of being late
- Proofs waiting for approval
- Purchases or stock issues that could delay work

4. Financial Reports

The money side of the business. Includes customer billing, cash collection, profitability, tax-ready summaries, and business performance.

Sales & Revenue

- Sales by day, week, month, quarter, and year
- Sales by product/service category
- Sales by customer
- Sales by employee or salesperson
- Average order value
- Deposit versus final payment mix
- Revenue by source: direct shop work, webstores, wraps, repeat customers

Billing & Payments

- Open invoices

- Overdue invoices
- Invoice aging: current, 1–30, 31–60, 61–90, 90+ days
- Payments collected
- Payment method mix
- Deposits due and deposits received
- Refunds, credits, write-offs, and failed payments
- Customer balance detail

Profitability

- Estimated versus actual revenue
- Estimated versus actual labor cost
- Estimated versus actual material cost
- Gross profit and gross margin by order
- Profitability by service category
- Profitability by customer
- Most and least profitable products or job types
- Rework and warranty cost impact

Taxes & Accounting

- Taxable sales
- Tax collected
- Tax owed by jurisdiction when supported
- Sales tax exception items
- Export-ready transaction detail
- Monthly income/expense category summaries
- Accounting integration reconciliation status

Cash & Forecasting

- Expected payments from open invoices
- Expected deposits from approved quotes
- Upcoming webstore payouts or fees
- Projected revenue from scheduled work
- Short-term cash collection forecast

5. Operations Reports

Measures the flow of customer work from quote through production, approvals, installation, completion, and follow-up.

Orders

- Orders by status
- Open order value
- Orders due today/this week
- Late orders
- Orders by type, customer, source, or owner
- Order aging
- Canceled and reopened orders

Production

- Production board workload by stage
- Time in each production stage
- Bottlenecks by stage or department
- Scheduled versus completed production
- Rework counts and reasons
- Jobs waiting on materials, artwork, approval, customer response, or install scheduling

Artwork & Approvals

- Proofs sent
- Proofs awaiting approval
- Approval turnaround time
- Revision cycles per order
- Approval delays by customer or job type
- Rejected proof reasons
- Signed document completion rates

Scheduling & Installs

- Scheduled installs
- Install completion rate
- Install duration estimates versus actuals
- No-show, reschedule, and cancellation tracking
- Crew workload
- Upcoming delivery, pickup, and install commitments

Documents & Compliance

- Missing required documents
- Unsigned contracts or acknowledgments
- Documents expiring or due for renewal
- Document completion by order type
- Customer packet delivery status

6. Customer & Sales Reports

Shows which customers are buying, how opportunities are converting, and where follow-up is required.

Customer Performance

- New versus returning customers
- Customer lifetime value
- Top customers by revenue, profit, and order count
- Customer purchase frequency
- Inactive customers
- Customer segmentation by industry, type, or tag

Quotes & Conversion

- Quotes created, sent, viewed, approved, declined, expired
- Quote-to-order conversion rate
- Conversion by salesperson, source, category, and customer type

- Average quote value
- Lost quote reasons
- Quotes needing follow-up

Sales Pipeline

- Pipeline by stage
- Forecast value by close date
- Follow-up activity
- Lead source performance
- Sales cycle length
- Opportunities with no recent activity

Retention & Follow-Up

- Repeat order rate
- Post-install or post-purchase follow-up status
- Customers due for reactivation
- Upsell/cross-sell opportunities
- Review request status

7. Webstore Reports

Covers every store as a business channel while keeping store-owner payout and platform data cleanly separated.

Store Performance

- Sales by store
- Orders by store
- Average order value
- Store conversion when traffic data exists
- Open and closing-soon stores
- Store goal progress for fundraisers
- Store performance by type: B2B, Fundraiser, Event, Promotional, Employee, General

Products & Catalog

- Best-selling products
- Variant performance
- Low-performing products
- Revenue and margin by product
- Product demand by size/color/style
- Out-of-stock or unavailable option impact

Payouts & Fees

- Owner share totals
- Platform fee totals
- Stripe/payment processing fee totals when available
- Payout status
- Unpaid or failed payout issues
- Store-level margin summary

Event & Fundraiser

- Fundraiser goal progress
- Donation totals
- Event deadline status
- Pickup/delivery status
- Late order volume
- Participant/team/group sales ranking when enabled

8. Materials & Purchasing Reports

Tracks stock, vendor spending, purchasing commitments, material consumption, and waste.

Inventory

- On-hand quantity
- Low stock and out-of-stock items
- Inventory value
- Usage trends
- Material movement history
- Reorder suggestions
- Expired, damaged, discontinued, or obsolete stock

Purchasing

- Purchase orders by status
- Open purchases
- Vendor lead time
- Expected delivery dates
- Received versus ordered quantities
- Purchase price variance
- Purchases by vendor and material category

Material Usage & Waste

- Material usage by order
- Usage by product/service category
- Waste by material, employee, machine, or job type
- Waste cost
- Roll/sheet utilization
- Material cost versus quoted material allowance

Vendor Performance

- Vendor spend
- Price changes
- On-time delivery rate
- Order issue rate
- Most-used vendors
- Alternative vendor comparison

9. Team & Labor Reports

Connects time, payroll, scheduling, attendance, and labor performance without turning every employee into a surveillance experiment.

Payroll & Time

- Hours by employee
- Hours by department or production stage
- Payroll totals by pay period
- Advances, payments, carryover, and adjustments
- Clock-in/out exceptions
- Missing time entries
- Export-ready timesheets

Labor Efficiency

- Estimated versus actual labor hours by order
- Labor cost versus quoted allowance
- Hours by order type
- Hours by production stage
- Labor utilization
- Overtime trends
- Rework labor impact

Scheduling & Capacity

- Scheduled hours versus available hours
- Employee workload
- Install crew capacity
- Upcoming staffing gaps
- Time-off impact
- Schedule adherence

Attendance & Team Activity

- Late/missed clock-in patterns
- Absence or time-off tracking
- Task completion
- Training/checklist completion when enabled
- Employee announcements acknowledgement when enabled

10. Wrap Lab Reports

Wrap-specific performance reporting for the Wrap Lab workspace and standalone product.

Project Performance

- Wrap projects by status
- Revenue and profit by vehicle type
- Design-to-install turnaround time
- Install scheduling status
- Project completion rate
- Deposit and final payment status

Labor & Materials

- Estimated versus actual install hours
- Material use by wrap project
- Waste by vehicle size/type
- Laminate/print/vinyl usage
- Install crew time
- Material cost versus estimate

Artwork & Approval

- Mockup/proof turnaround time
- Revision cycles
- Customer approval delays
- Brand asset completeness
- Pre-install document/signoff status

Quality, Warranty & Aftercare

- Post-install follow-up completion
- Warranty claims
- Issue type and root cause
- Rework cost
- Customer care packet delivery
- Recurring issue patterns by material, vehicle, or install type

11. Custom Reports

Custom Reports is the build-anything workspace. It is not a second reporting system; it uses the same approved data, filters, totals, and drill-down behavior as all standard reports.

Core Builder Flow

- Choose a primary data source.
- Choose columns and calculated fields.
- Add filters and date range rules.
- Group, sort, subtotal, and compare data.
- Choose table, chart, summary-card, or combined layout.
- Save as a private report, shared team report, or role-restricted report.
- Schedule delivery or export on demand.

Approved Data Sources

Data Source	Example Fields Available
Customers	Customer type, tags, industry, location, lifetime value, order count, balances, first/last purchase dates.
Quotes	Quote status, value, sent date, approval date, expiration date, conversion outcome, source, salesperson.
Orders & Order Items	Order status, category, dates, customer, price, costs, profit, production stage, install/pickup details.
Invoices & Payments	Invoice status, balance, due date, payment date, method,

Data Source	Example Fields Available
	deposits, refunds, write-offs, aging bucket.
Production & Work Orders	Stage, assigned team, due date, time in stage, hold reason, completion date, rework reason.
Artwork, Proofs & Approvals	Proof status, sent/approved dates, revision count, signed document status, approval turnaround time.
Webstores & Store Orders	Store type, store owner, sales, orders, product, payout status, fee totals, fundraiser progress.
Inventory & Purchases	Material, vendor, quantity, cost, reorder level, purchase order status, stock movement, waste.
Team, Time & Payroll	Employee, hours, pay period, labor stage, schedule, adjustments, attendance exceptions, payroll total.
Wrap Lab Projects	Vehicle type, project phase, install hours, material use, proof/approval status, warranty/aftercare data.

Builder Controls

Control	What It Does
Filters	Date ranges, statuses, customer tags, categories, users, employees, vendors, stores, locations, payment states, production stages, and custom fields.
Grouping	By day/week/month, customer, category, employee, salesperson, vendor, store, job type, product, vehicle type, or custom tag.
Calculations	Count, sum, average, min/max, percentage, margin, variance, ratio, aging, and formula-based calculated fields.
Comparisons	Previous period, previous year, budget/target, estimated versus actual, and selected benchmark when available.
Visuals	Summary cards, table, line chart, bar chart, stacked bar, pie/donut only for small category comparisons, and trend indicators.
Permissions	Private, shared with selected users, role-based, finance-restricted, manager-only, or platform admin-only.
Output	On-screen, CSV, Excel, PDF, print layout, scheduled email, dashboard card, or saved operational shortcut.

12. Scheduled Reports

- Daily: overdue invoices, orders due soon, production bottleneck report, low-stock report, open approvals.
- Weekly: sales summary, quote follow-up list, production plan, labor summary, webstore order/export list.
- Pay-period: payroll/timesheet package, attendance exceptions, labor cost by order or department.
- Monthly: financial summary, profit/margin summary, sales by category, customer retention, materials/vendor spend, wrap performance, webstore payouts.

- Event-triggered: store closing report, fundraiser goal reached report, invoice overdue escalation, large-order approval delay, material below reorder threshold.

13. Exports

Export Type	Use
CSV / Excel	Detailed data analysis, accounting uploads, tax preparation, payroll import/export, and owner-supplied spreadsheets.
PDF	Printable management summaries, customer-facing summaries when appropriate, install packets, production summaries, and archived monthly reports.
Print Layout	Shop-friendly printouts for meetings, production huddles, payroll review, and owner review.
Accounting Export	Transaction detail and summaries formatted for approved accounting integrations or reconciliation workflows.
Payroll Export	Pay-period hours, adjustments, advances, payments, carryover, and employee totals.
Tax Export	Taxable sales, tax collected, exception items, and jurisdiction-based summaries where supported.

14. Architecture Rules to Protect

- One reporting engine only. Operations, Webstores, Wrap Lab, Materials, Payroll, and Team pages may provide filtered shortcuts, but they never create separate report builders.
- Reports must preserve source-of-truth links. Every total should drill into the underlying records when the user has permission.
- Role permissions apply to both viewing and exporting. Payroll, cost, margin, and platform-level data must be protected.
- Every saved report stores its data source, fields, filters, groupings, calculation definitions, visualization, owner, permissions, and schedule as one report definition.
- Custom calculated fields must be clearly labeled and must not overwrite stored financial or operational values.
- Use estimated versus actual comparisons wherever the app has both values, especially labor, materials, production duration, and profitability.
- Keep default reports opinionated and practical. The builder is for flexibility, not an excuse to make every user invent basic shop reports from scratch.

15. Initial Launch Priority

Build the first set before expanding into every possible report. Otherwise the report catalog will become a museum of empty screens.

Phase	Scope
Phase 1: Must Launch	Overview; Sales & Revenue; Billing & Payments; Orders; Production; Quotes & Conversion; Inventory; Payroll & Time; Basic Webstore Performance; Custom Reports with tables/filters/export.
Phase 2: Strong Business Intelligence	Profitability; Material Usage & Waste; Customer Retention; Scheduling & Capacity; Wrap Lab Performance; Scheduled

Phase	Scope
	Reports; dashboard cards.
Phase 3: Advanced Analysis	Forecasting; vendor performance; advanced comparisons; chart builder; calculated fields; role-sharing; automated exception reports; platform-wide analytics for SignGuy AI admin.

16. Final Naming Recommendation

Navigation: Business Management → Reports

Primary tabs inside Reports: Overview | Financial | Operations | Customers & Sales | Webstores | Materials & Purchasing | Team & Labor | Wrap Lab | Custom | Scheduled | Exports

Build action: Build a Report
